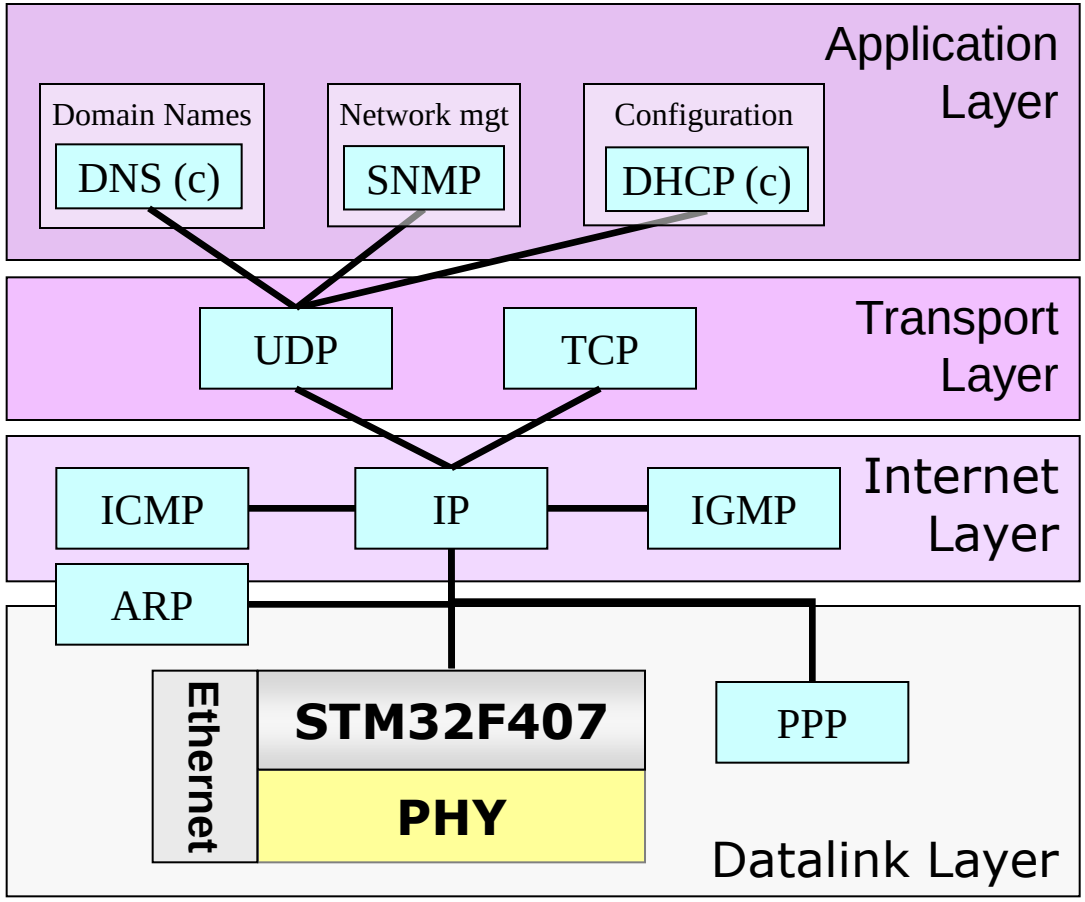
LwIP Distribution protocols

Application protocols
- SNMP,
- DNS client,
- DHCP client,

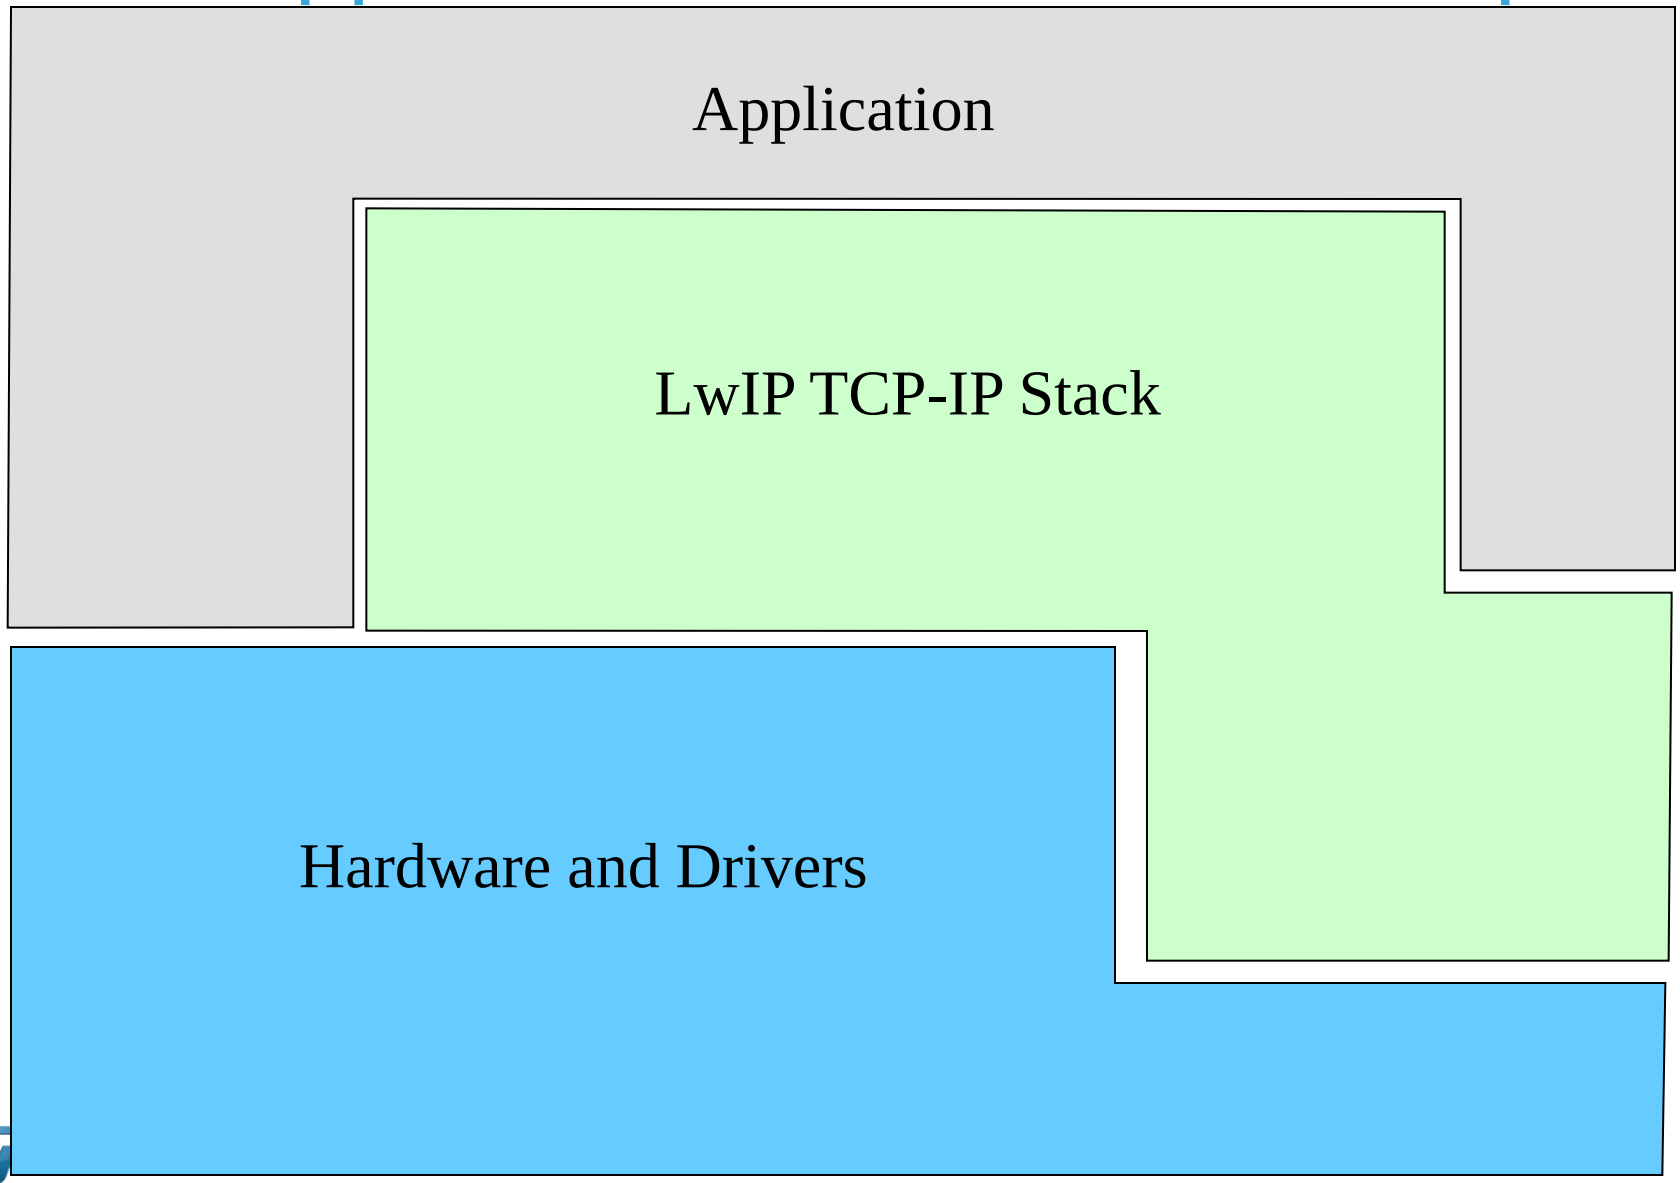
Transport protocols
- UDP,
- TCP,

Internet Protocols
- ICMP,
- IGMP,

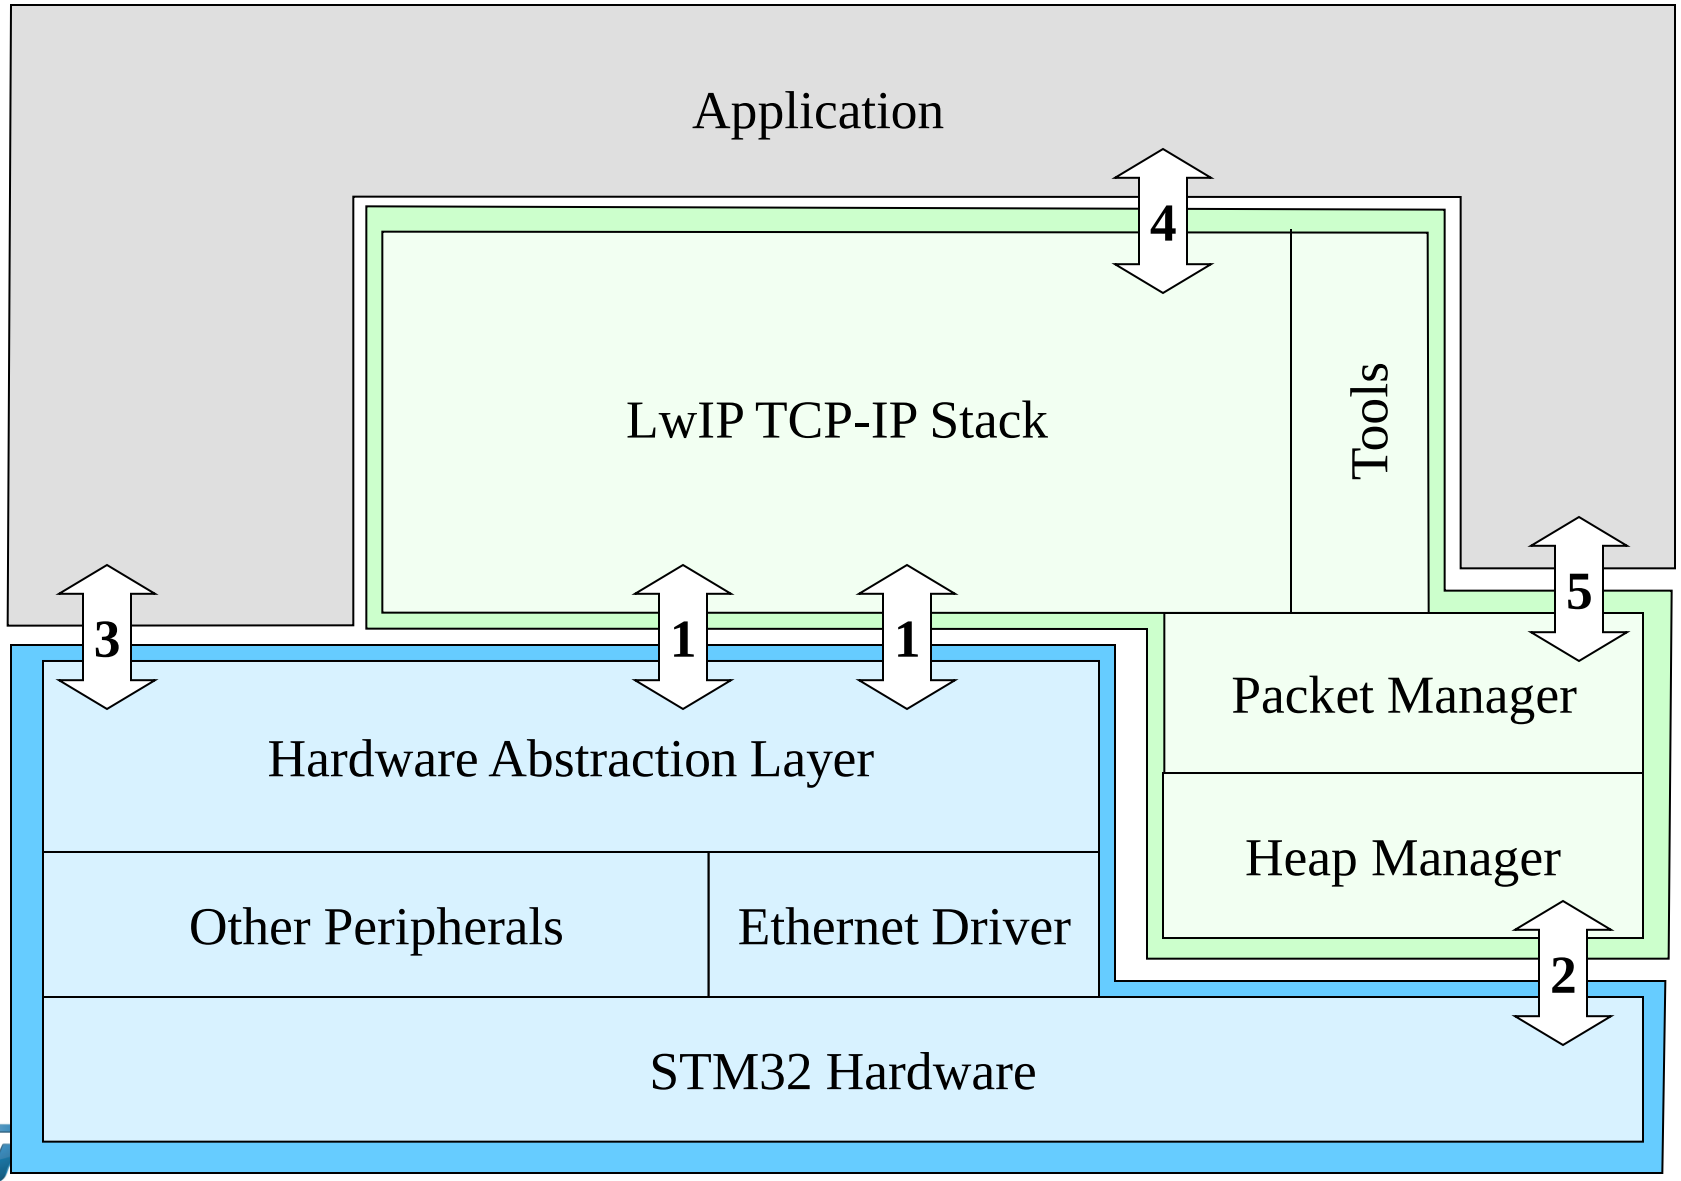
Datalink Protocols
- ARP,
- PPP



Application Architecture example



Application Architecture example (details)



Lwip add-on application

Application	Solution
Webserver	Demo by ST
DHCP client	Demo by ST
TFTP client & server	Demo by ST
UDP echo client & server	Demo by ST
TCP echo client & server	Demo by ST
UDP simple client demo	Demo by ST Available on demand
UDP simple server demo	Demo by ST Available on demand
TCP simple server demo	Demo by ST Available on demand
TCP client demo with DNS	Demo by ST Available on demand
SNMP client	Please refer to http://savannah.nongnu.org/projects/lwip/
SMTP client	
NetBIOS nameserver	
Ping (board => PC)

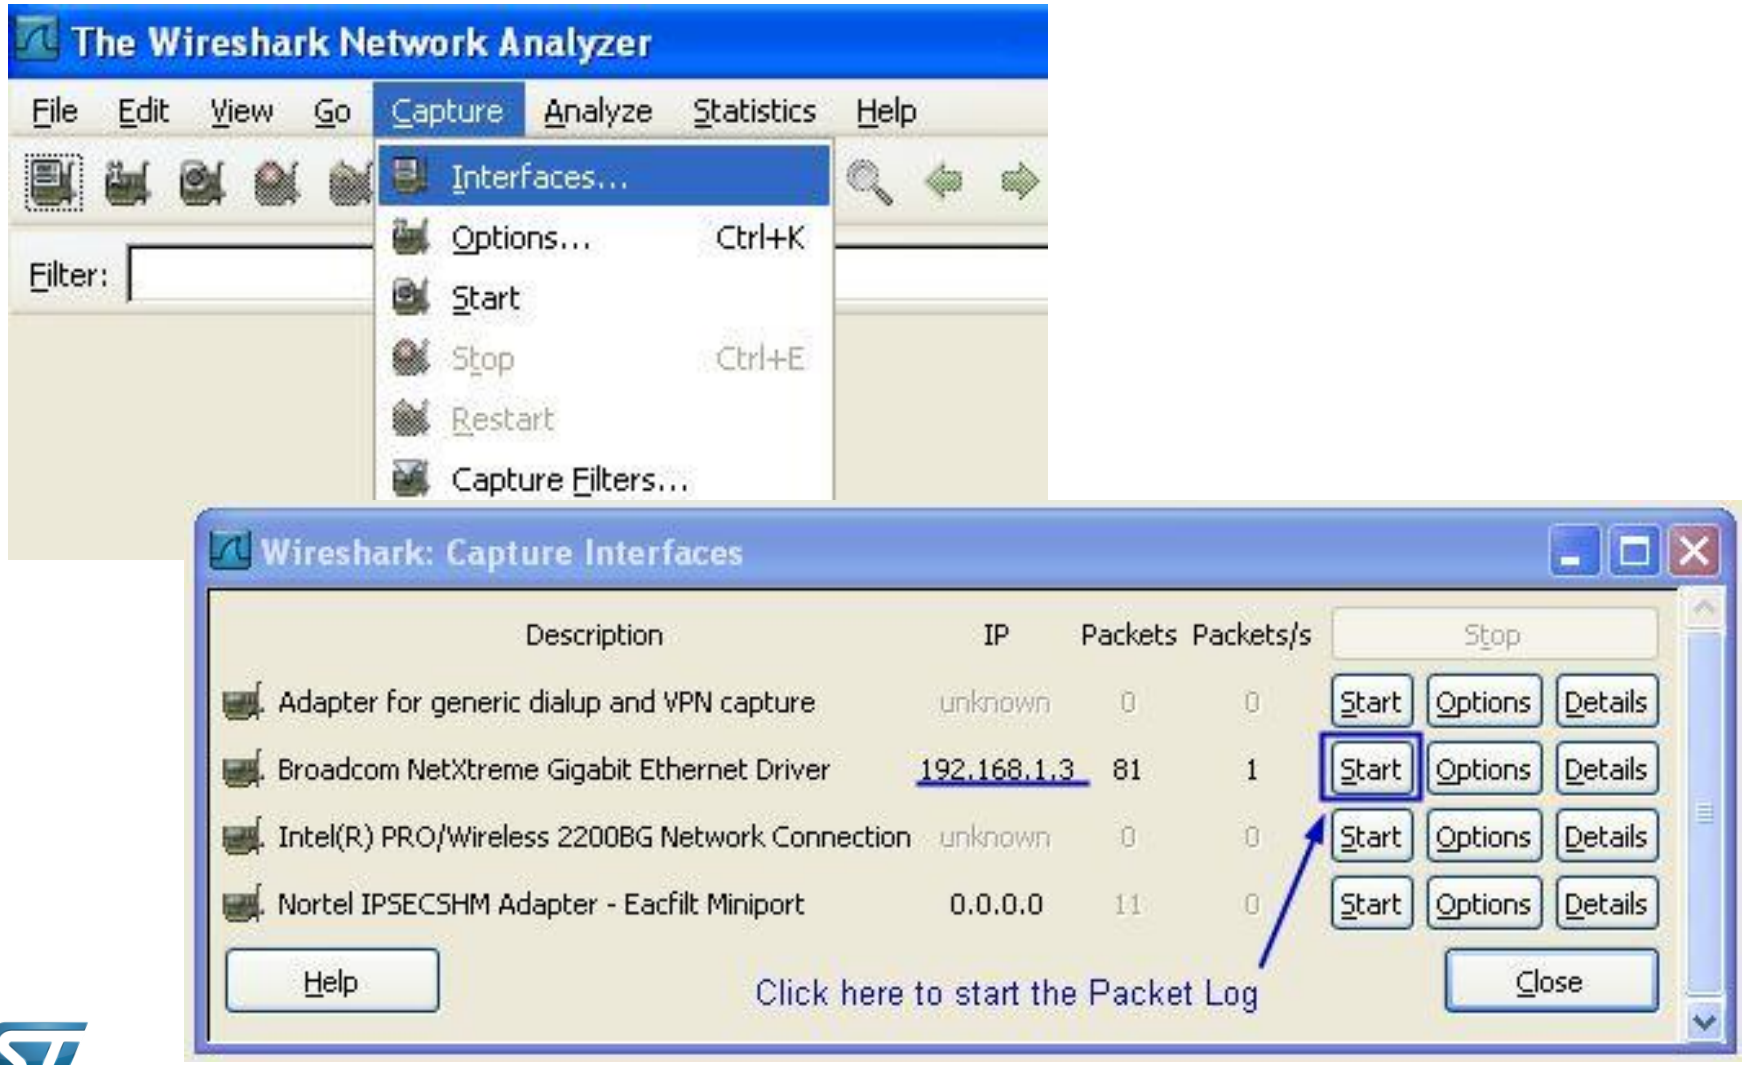
Useful tools: WireShark

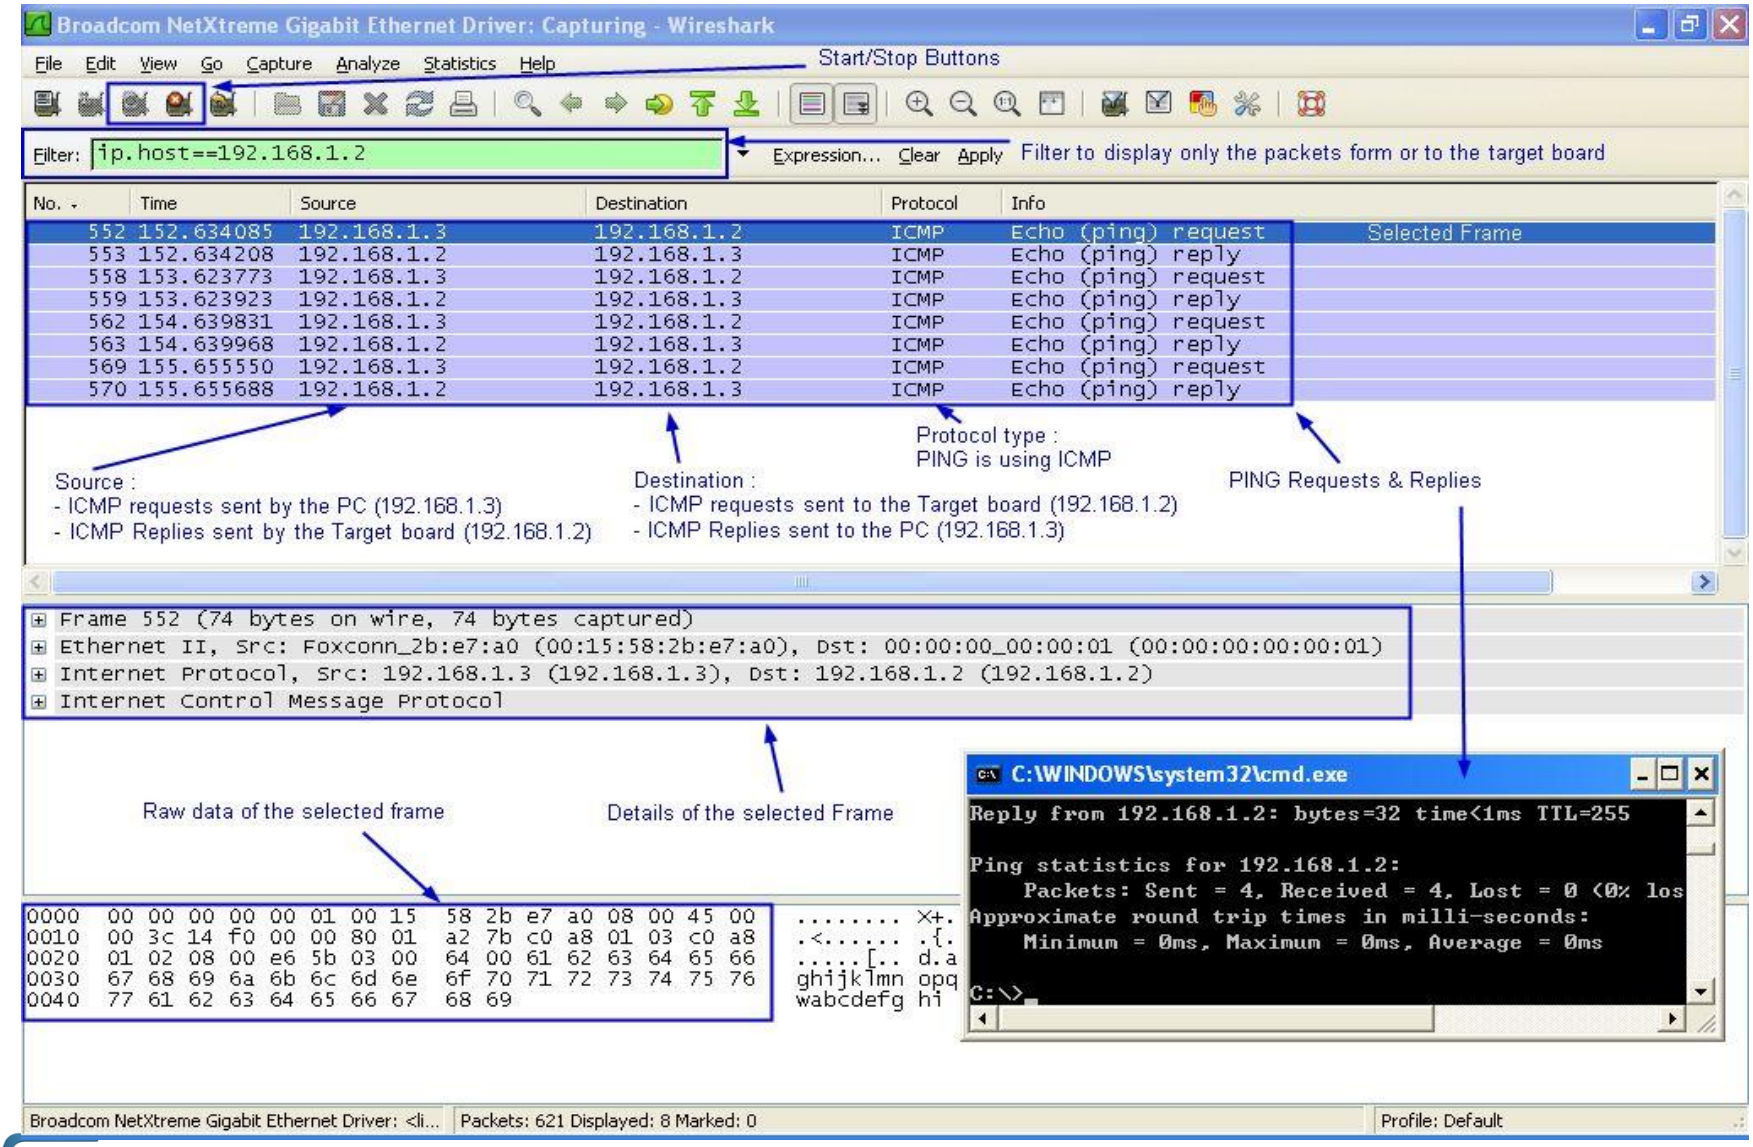
- WireShark is
  - a network monitoring tool
  - It uses WinPcap that interfaces directly with the Network card
- Wireshark allows you to
  - See all the packets sent or received by the PC
  - Filter the packets to display only the relevant information.
  - The packets content is formatted for easy reading
  - This Software cannot send any data

WireShark : how to use it

- Select the network interface you want to monitor



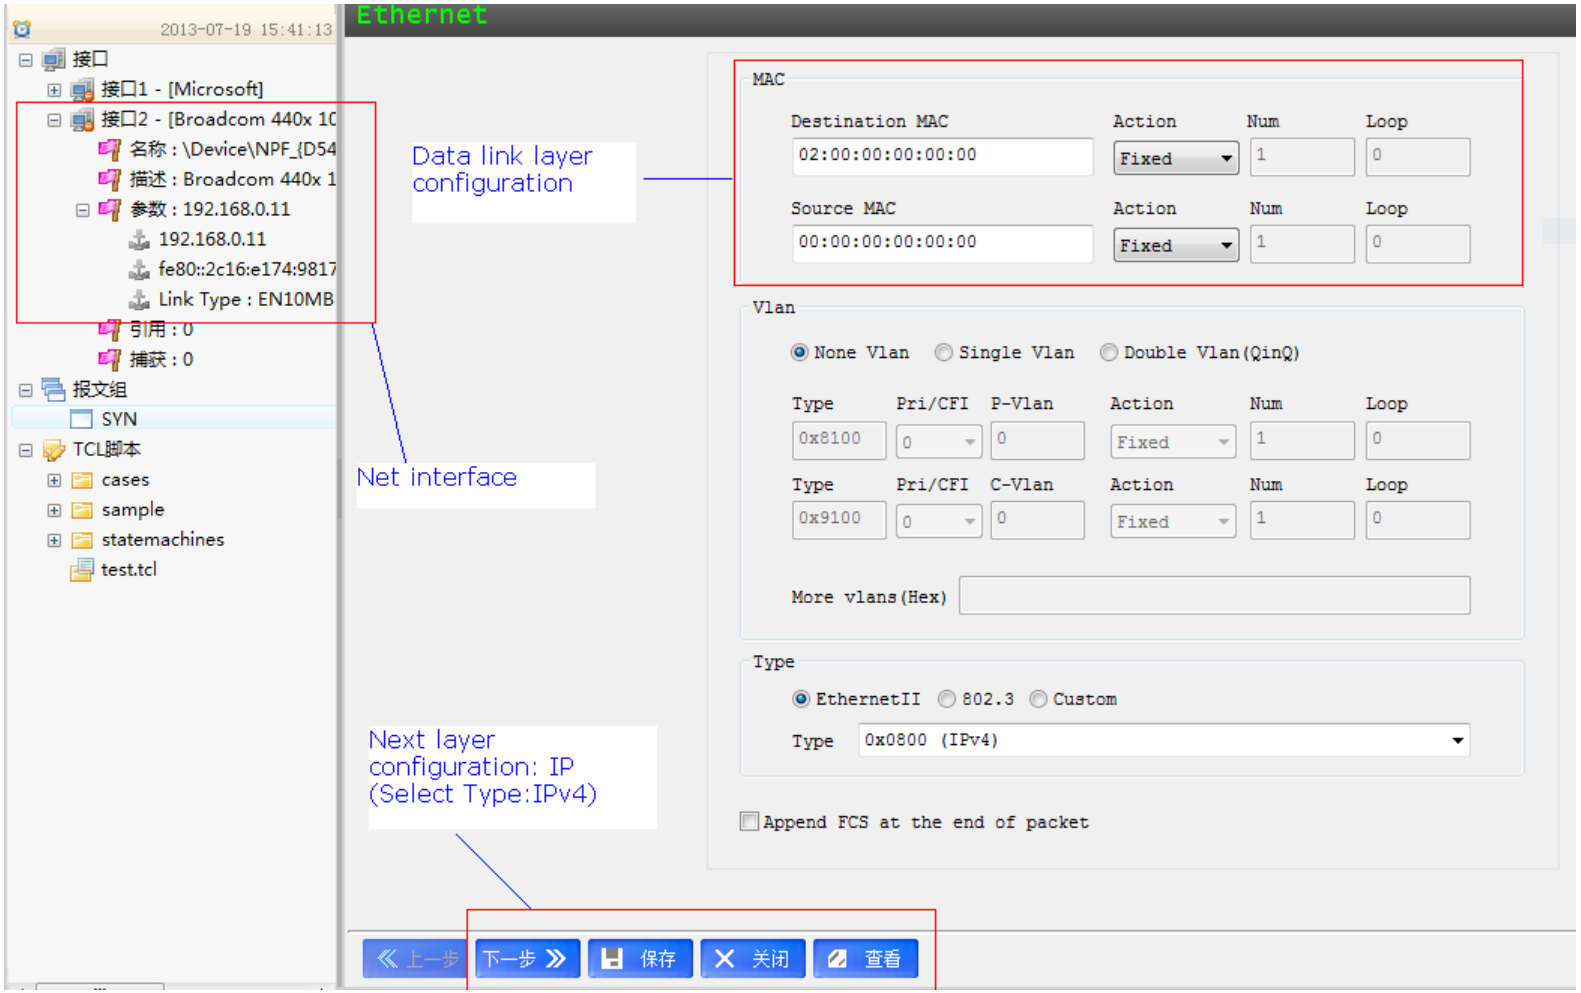
WireShark : ICMP Echo Requests & Replies



Useful tools: xcap

- Xcap is
  - A windows packet generator & sender tool through a specified interfaces on you computer.
- What you can do through this tool:
  - create a packet by a packet creating wizard
  - send the packet you created
  - create ipv4&ipv6 fragments, you can create a long packet(can not exceed 16K bytes)
  - browse the packet by WireShark

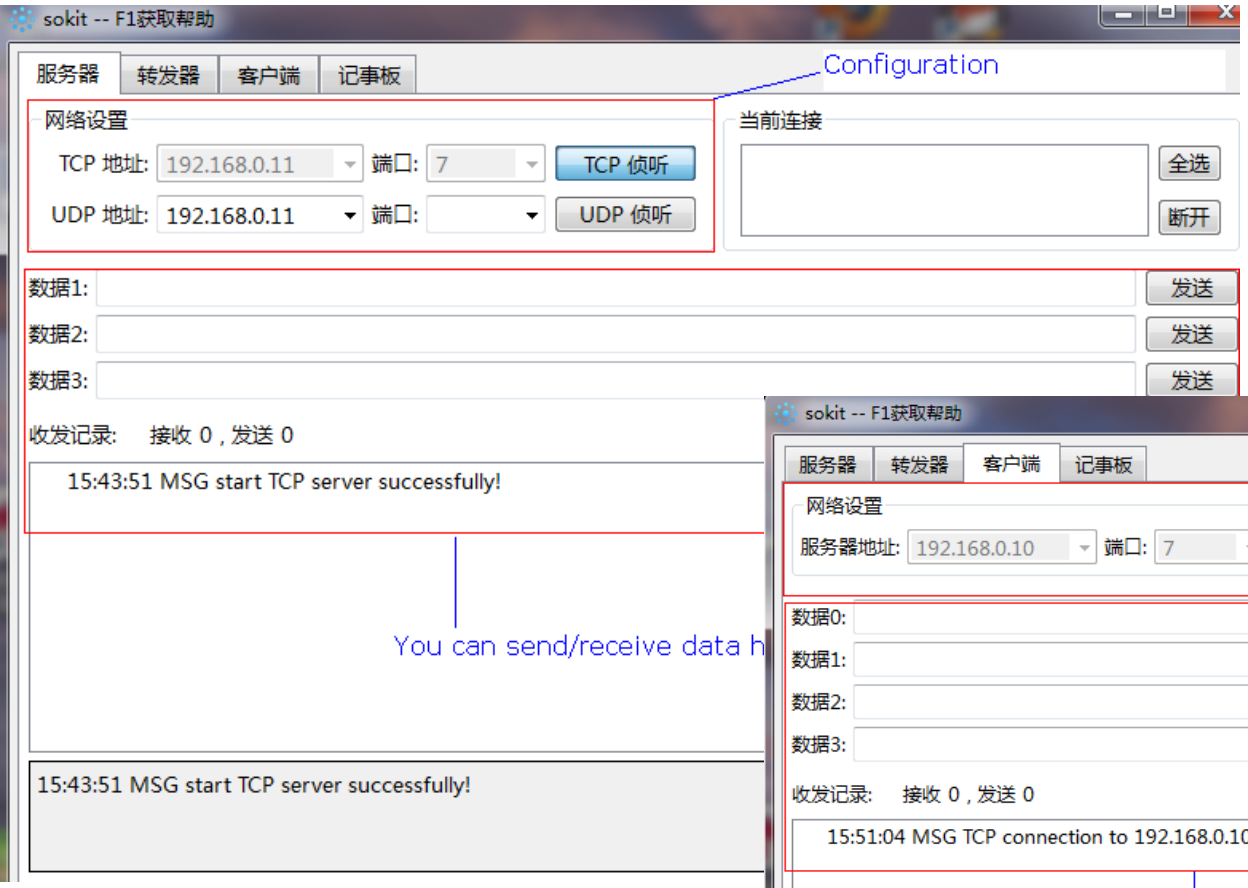
Xcap: How to use it (Please refer to help)

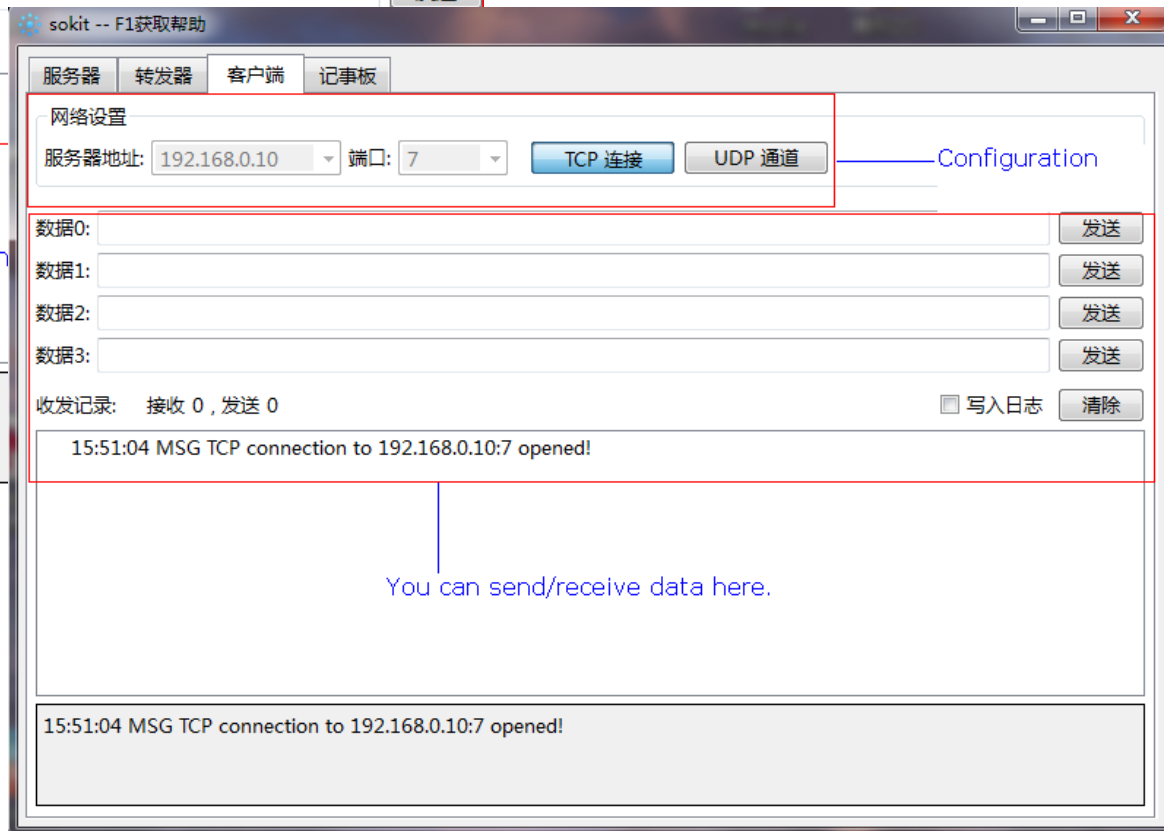


Useful tools: sokit

- What does this software do:
  - Allow to send/receive UDP data
  - Allow to send/receive TCP data (TCP client)
  - Allow to listen for incoming TCP connection, send/receive TCP data (TCP server)

sokit: How to use it

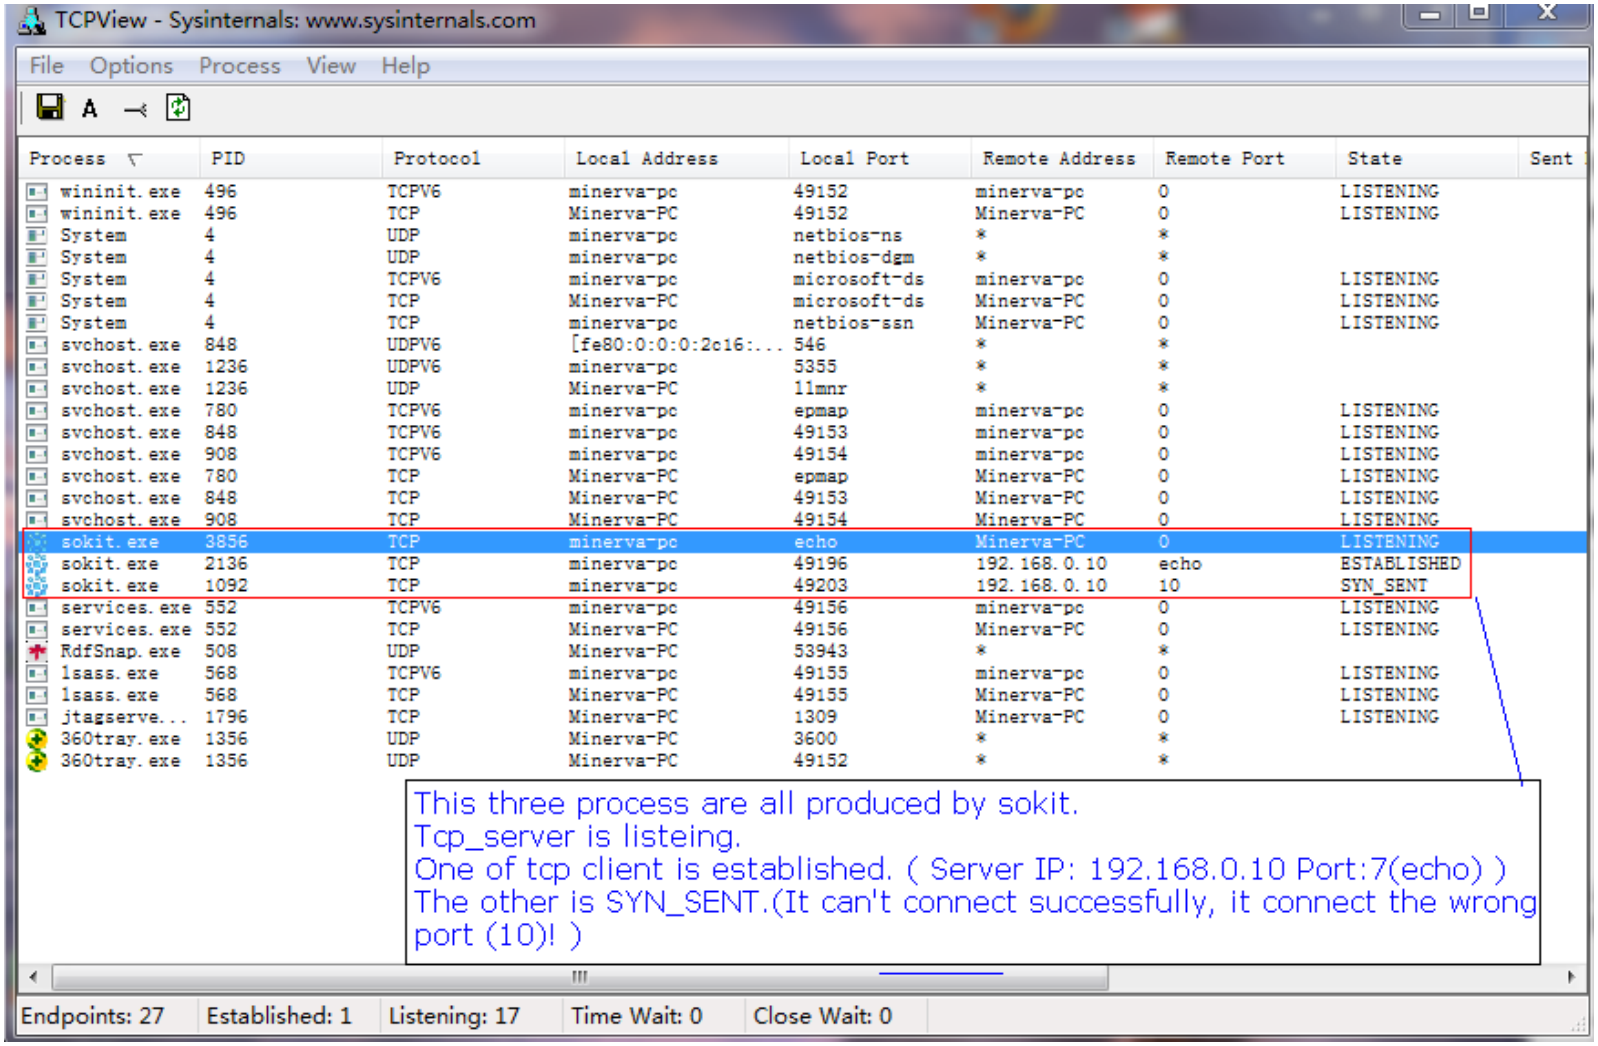




Useful tools: TCPView

- TCPView is
  - a Windows program that will show you detailed listings of all TCP and UDP endpoints on your system
  - including the local and remote addresses and state of TCP connections.

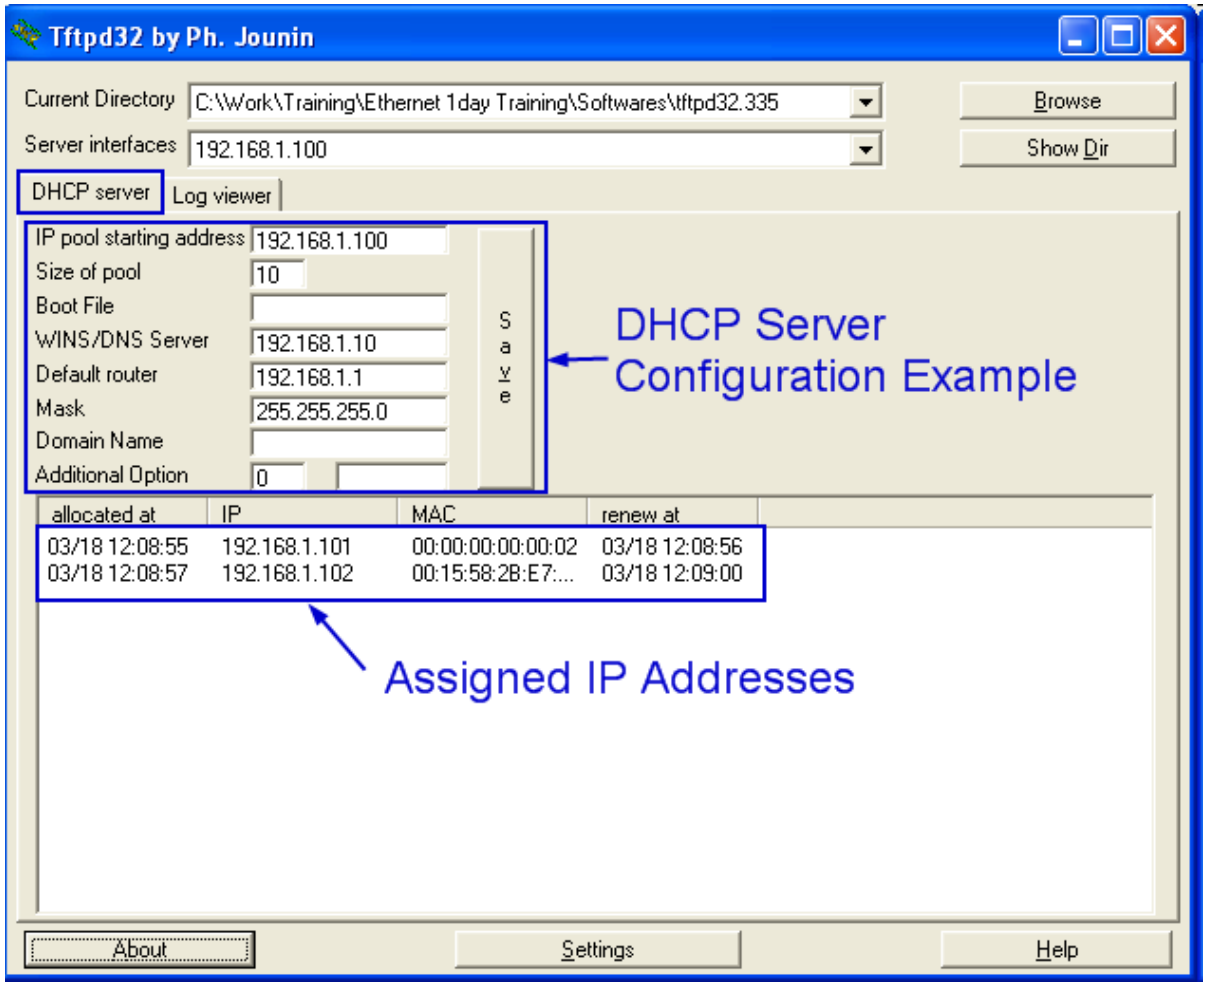
TCPView: How to use it



Useful tools: TFTPD32

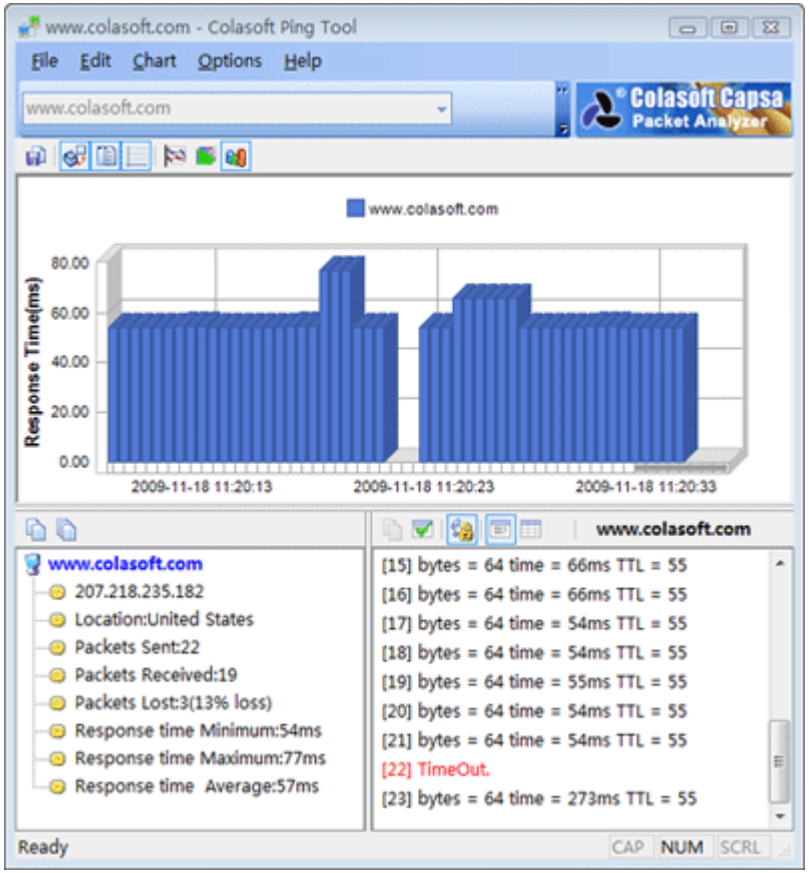
Features

- DHCP Server
- TFTP Server
- TFTP Client
- SNTP Server
- Syslog Server
- DNS Server



Useful tools: Colasoft Ping Tool

- Features
  - Graphic window
  - Ping – Summary
  - Ping - Details



Useful tools: (Need License)

- Ping Tester
- TCP Viewer
- And so on…
